RASD

The RASD Document

The approach

We tried to solve all the easy problems with a KISS approach, in order to focus on the actual difficulties.

- ▶ Login, logout, registration were kept as standard as possible
- ▶ Usability was kept in mind, customizability was not considered as a feature
- ▶ We tried to keep as little as possible the user inputs and let the application do the work

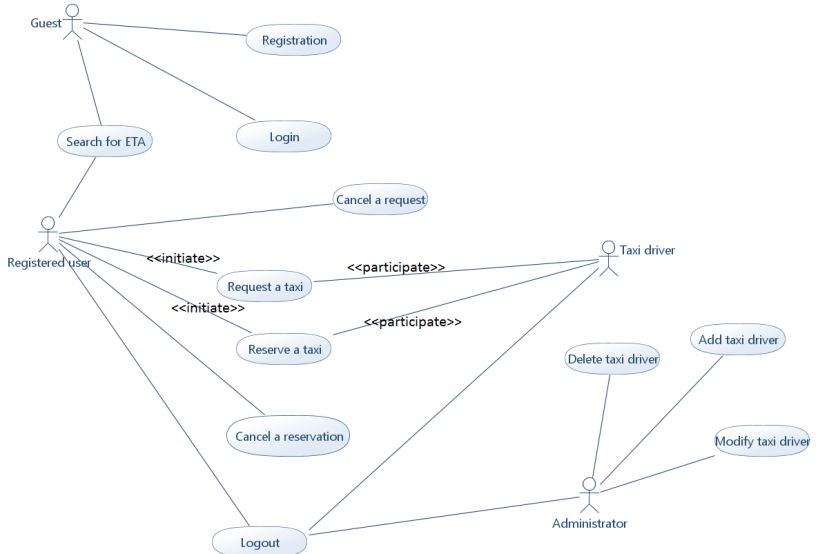

Two simple interfaces

Adaptive web-based UI to ensure maintainability

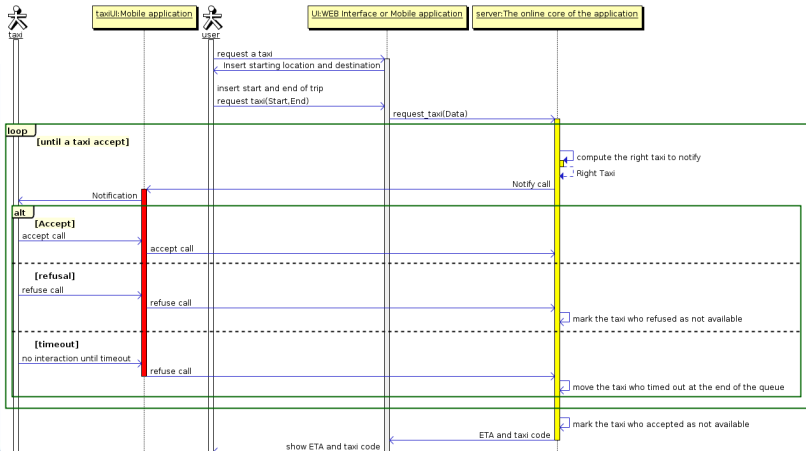

Use Cases

All the actions allowed were planned and analysed

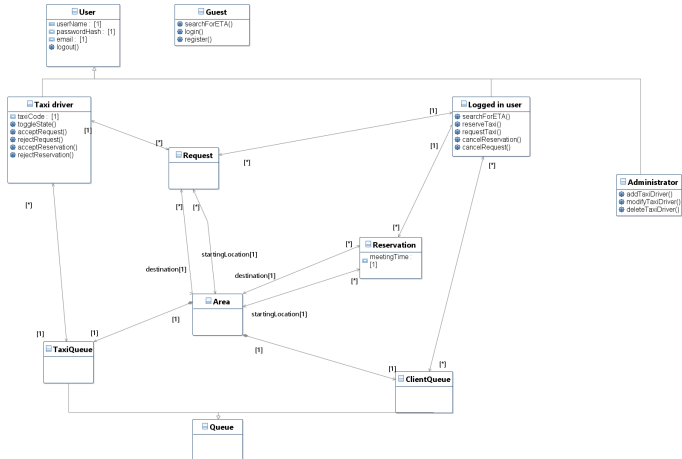

Use Cases

Each use case is analysed in depth with a sequence diagram

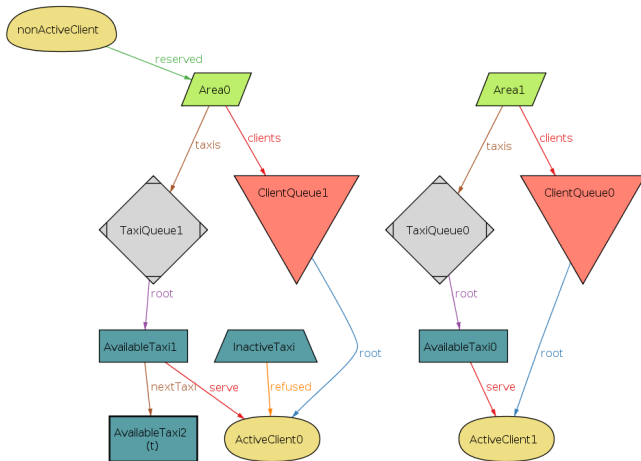

Class Diagram

The class diagram was kept as readable as possible, underlying the main decisions taken

Alloy

Design Document

The Deployment

A standard DMZ + Internal network approach was used

The Component
